Profile

As a recent graduate of my second year, fueled by a passion for data science, I am enthusiastic about applying my analytical skills and coding expertise to contribute effectively in a dynamic, data-driven environment. Eager to immerse myself in opportunities that foster learning, growth, and the ability to make a meaningful impact.

Education

2020 – 2022	Patkar Varde College
Mumbai, India	<i>HSC</i>
2022 – present	School of Data Science & Business Intelligence
Mumbai, India	<i>BSc</i>

Skills

Excel / VBA	Power BI
Machine Learning	Statistics
Python	SQL
R Programming	

Projects

Loan Approval

Undertook a project where I analyzed customer data to determine loan eligibility. Utilized statistical analysis and machine learning techniques to assess the risk factors and predict loan approval probabilities. Presented actionable insights to facilitate informed decision-making, showcasing my ability to apply data-driven methodologies to real-world scenarios.

Starbucks Analysis

Researched Starbuck's growth and analyzed various data points such as financial records, store locations, and customer feedback. Used this information to understand what factors contributed to Starbuck's success and how they grab the opportunities for further growth which was presented to our faculty.

Internship

Sparks Foundation

Virtual

Two task were given to me which I was told to be completed within the time limit of 1 Month.
