Company Name: ZIGRAM**Position:** Data Science**Last Date to Apply:** 16th September, 2023**About the Company:**

ZIGRAM is a high-impact organization that operates in the data asset space. Our team is made up of professionals from varied domains like data science, technology, sales, financial services, research, and business consulting. Our aim is to deliver value to clients by building and managing data assets across use cases, thereby boosting revenues and reducing the cost of doing business, in a data-driven world.

Responsibilities:

- Work on data cleaning and data wrangling on data assets
Find insights and/or build visualizations
- Build logical/domain-based features for products & data assets
- Create models from text data, drawn heavily from statistical, machine learning as well as rule-based models
- Work on leveraging different Natural Language Processing Techniques (such as building taggers, parsers, etc.)
- Work closely with the product teams to implement data science components that power user and developer-facing product components

Qualifications:

- Graduate or postgraduate in math or statistics from a reputed college or university

Skill(s) required:

- Data Analytics
- Data Science
- Deep Learning
- Machine Learning
- Natural Language Processing (NLP)
- Python / SQL

Who can apply:

- are available for the work from home job/internship
- can start the work from home job/internship between 12th Aug'23 and 16th Sep'23
