SUMMARY

Aspiring Data Scientist with hands-on experience in data analysis, machine learning, and natural language processing (NLP). Proficient in various programming languages, including Python and Scala. Familiar with data collection, cleaning, and visualization techniques, as well as implementing machine learning models. Developed a VBA project automating customer food orders, integrating queue management, and workflow automation. Enthusiastic about leveraging data to derive insights and drive decision-making.

PROJECTS

Starbucks Data Analysis

· Conducted a comprehensive data analysis and research project on Starbucks using Python, Pandas, and Matplotlib. Analyzed seasonal sales trends and discovered that coffee sales peak during colder weather, particularly in winter or rainy conditions. Additionally, identified a consumer preference shift toward cold beverages, such as Frappuccino's and iced teas, during heatwaves or hot weather.

Food Order processing system

· Developed a VBA-based Restaurant Order Management System that automated the food ordering process. Once customers finalized their orders, the system queued them in a list for processing by the chef. After preparation, the completed orders were automatically removed from the queue, streamlining the workflow from order placement to fulfillment.

EDUCATION

BSC - Data Science

School of Data Science and Business Intelligence(SDBI) · Goregaon West · 2025

HSC in Science

Patkar Varde College · Goregaon West · 2022

CERTIFICATIONS

SQL for Data Science

Cooursera · 2023

· https://www.coursera.org/account/accomplishments/verify/69DM7A2ZKY28

AWS for Beginners

Great Learning · 2023

· https://olympus.mygreatlearning.com/courses/21463/certificate

SKILLS

Excel , SQL ,Python , Power BI , R , NLP

Data Science , Data Analytics

Hardworking , Good Listener , Quick Learner
